

# A Look at Prevailing Dental Fees

Prevailing fee is the term used by insurance carriers, including Principal Life Insurance Company, when referring to the fee most commonly charged for a dental service in a given area.

The prevailing fee screening percentile is determined by finding a range of usual fees charged by dentists of similar training for the same service within the geographic area as shown in this example:

| Dentist                             | Exam fee      |  |
|-------------------------------------|---------------|--|
| Dr. Smith                           | \$25          |  |
| Dr. Jones                           | \$30          |  |
| Dr. Green, Dr. Barker, Dr. Peterson | \$35          |  |
| Dr. Porter, Dr. Harrison            | \$40          |  |
| Dr. White                           | \$45          |  |
| Dr. Carroll                         | \$50          |  |
| Dr. Gray                            | Dr. Gray \$55 |  |

## Based on their usual fees:

| Percent | Charge       |  |
|---------|--------------|--|
| 50%     | \$35 or less |  |
| 80%     | \$45 or less |  |
| 90%     | \$50 or less |  |

The prevailing fees would look like this:

| Percentile       | Prevailing fee |  |
|------------------|----------------|--|
| 50 <sup>th</sup> | \$35           |  |
| 80 <sup>th</sup> | \$45           |  |
| 90 <sup>th</sup> | \$50           |  |

Principal Life's available prevailing fees include the 50<sup>th</sup>, 60<sup>th</sup>, 70<sup>th</sup>, 75<sup>th</sup>, 80<sup>th</sup> (standard), 85<sup>th</sup>, 90<sup>th</sup>, 95<sup>th</sup> and 99<sup>th</sup> percentiles.

Principal Life fee data is updated twice a year using a combination of independent information and our own claim information to help ensure the credibility of the prevailing fee established.

## Examples

Below are examples of claim payments using network and non-network providers. The in-network column shows the savings when a network provider is used. The next column shows a non-network provider's charge at the contract's prevailing fee percentile of 80 percent. The last column is a non-network provider's charge above the contract's prevailing fee screening.

| Examples   |            |                                |  |  |
|--|------------|--------------------------------|--|--|
| Benefit comparison of a root canal (molar)                             | In-network | Non-network                    |  |  |
|  |            | 80 <sup>th</sup><br>percentile | Above the<br>80 <sup>th</sup> percentile |  |
| Fee charged  | \$650      | \$830                          | \$985                                    |  |
| Non-network accepted charge at 80 <sup>th</sup> percentile             | NA         | \$830                          | \$830                                    |  |
| Principal Life coinsurance at 80%                                      | \$520      | \$664                          | \$664                                    |  |
| Employee coinsurance at 20%  | \$130      | \$166                          | \$166                                    |  |
| Employee pays difference<br>between fee charged and<br>accepted charge | NA         | \$0                            | \$155                                    |  |
| Employee pays  | \$130      | \$166                          | \$321                                    |  |

Employees maximize their dental benefits and reduce their out-of-pocket expenses by using network providers. Employers can also benefit from cost containment when network providers are used. In the example above, the claim payments—the amount paid by the carrier—is reduced by more than \$140 through the participating provider
